

CORE FRAMEWORK

Next.js	App Router, Server Actions	React	UI library
TypeScript	Type-safe development	Node.js	Runtime environment

DATABASE & DATA LAYER

Prisma	ORM & migrations	PostgreSQL	Production database
SQLite	Local development	Zod	Schema validation

STYLING & UI COMPONENTS

Tailwind CSS	Utility-first styling	Radix UI	Accessible primitives
Framer Motion	Animation & transitions	Lucide Icons	Icon system
next-themes	Light / dark mode	Recharts	Analytics & charts

INTERACTION & STATE

dnd kit	Drag-and-drop pipeline	Zustand	Client-side state
---------	------------------------	---------	-------------------

AUTHENTICATION & SECURITY

JWT (jose)	Session tokens	bcrypt	Password hashing
Rate limiting	Abuse prevention	Security headers	HSTS, CSP-adjacent policies

AI & COMMUNICATIONS

Claude (Anthropic)	Conversational AI engine	Resend	Transactional email
--------------------	--------------------------	--------	---------------------

QUALITY & TOOLING

Vitest	Unit & integration testing	ESLint	Code quality
--------	----------------------------	--------	--------------
